	Но	Housing Situation of Returning Pop				Dulation : None					
WATER:	Ту	Comments: The Russian war did n Type of Potable Water Sources (and distance):				not affect this district. River, springs, streams, DACAAR pipe scheme. 100m to 1km.					
	Av	Availability of Potable water (%):			r (%):	20%					
	Sa	Sanitation and Drainage:				Local system					
	po mo	Comments: Most people drink river and stream water, however this is not potable as waste products are discarded in the river. As the area is mountainous it is not possible to dig shallow wells here. A pipe scheme would benefit the district.									
AGRICUL		Main crops:				Maize and wheat.					
	Cı	Current Land Condition:				Little arable land due to mountainous terrain					
	I	Dens 4 of 4 Mound Nuristan									

GENERATION: of Income: husbandry. in the district Comments: Many men travel to Pakistan for work. The people of this district have a strong sense of responsibility, in that they wish to preserve the forest and do not engage in timber selling. Vocational training (eg fish farming, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. HEALTH: Image: Training (eg fish farming, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. Elefore 1998 HEALTH: Image: Training (eg fish farming, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. 1 HEALTH: Image: Training (eg fish farming, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. 1 HEALTH: Image: Training, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. 1 HEALTH: Image: Training, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. 0 HEALTH: Image: Training, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. 0 HEALTH: Image: Training, tailoring, carpeting, poultry farming, tailoring, carpeting, poultry farming, tailoring, carpeting, poultry farming, tailoring, carpentry) would greatly benefit the district. 0 HEALTH: Image: Training, tailoring, carpeting, poultry farming, tailoring, carpeting, poultry farming, tailoring, c		Agri/tool Banks				ir for ke	eping snow and	l rain		
Agriftool Banks: Local system Animal Husbandry Cows. goats and donkeys. Corments: The inhabitants of the area have made small fields on the mountain slopes. All the agricultural work is carried out by women. For irrigation they have made a reservoir for snow and rain water, however because the land is much higher than the river the are cultivated is insulficient to support the population. Men are responsible for animal husbandry, however many animals die due to lack of vetineary services. INCOME Main Sources Agriculture and animal husbandry, however many animals die due to lack of vetineary services. INCOME Main Sources Agriculture and animal husbandry, however many animals die due to lack of vetineary services. INCOME Main Sources Agriculture and animal husbandry, however many animals die due to lack of vetineary services. INCOME Main Sources Agriculture and animal husbandry, now ork. The people of this district have a strong sense of responsibility, in that they wish to preserve the forest and do not engage in timber selling. Vocational training (eg fish farming, tailoring, carpeting, poultry farming, carpentry) would greatly benefit the district. HEALTH: Healt Training husbandry. Imments: the clinic is no by NAC. It has 18 staff - one doctor, 2 male nurses, 1 female nurse, 1 mid-wife, 1 Th technician and 1 dentist. It has an outpatients' department and an emergency ward with 4 beds. OPD fees and medicine charges are free. NAC has also trained 100 traditional birth attendants and there are vaccinatin programmes. EDUCATIO		•					1 0
