

Mogadishu IDP Influx

2011 has witnessed an unprecedented arrival of IDPs into Mogadishu due to drought related reasons. While the largest influx of IDPs occurred in January 2011, trends indicate that since March, the rate of influx has been steadily increasing. Based on IASC Population Movement Tracking (PMT) data, this analysis aims to identify the key areas receiving IDPs in Mogadishu as well as the source of displacement this year.

1st Quarter
