FUNDING

113.7M
Funding Required

Although the financial tracking system (FTS) denotes that the Sector has been provided with 18.5 % of funding towards its target of 113.7 million, this does not reflect the full funding picture for Protection operations in 2018. Many Protection interventions have been funded thus far through internal agency sources, including unarmarked contributions, that are not included in the tracking system. Any such sources of funding will be reflected at years end within the financial tracking system.

Protection

Achievements: From January to November 2018, around 2.5 million individuals were reached through protection services in terms of provision of protection-based materials, legal aid and access to legal documentation, livelihood support, and protection messaging and training in Borno, Adamawa and Yobe (BAY) states. North-east Nigeria continues to register numerous IDP and refugee returnees across locations. In 2018, 40,393 returnees have been registered by the Nigeria Immigration Service (NIS), of which 96% were unregistered in the country of asylum (CoA) and 24% returning involuntarily.

In November 2018, Pulka area of Gwoza LGA in Borno State received 460 households (1,143 individuals) of refugee returnees from Kirawa, Cameroon and six individuals from Tamuro, Niger. The new arrivals stated that poor living conditions in the country of asylum triggered their return to Nigeria. While they were assisted with NFI kits, most of the new arrivals are still housed at a transit centre as shelter remains a major concern.

In the framework of access to legal documentation to enhance IDPs and returnees' legal protection, some 185 IDPs were provided with E-national ID cards at Dalori IDP Camp in Maiduguri. As of November 2018, about 10,000 individuals are estimated to have been provided with ID cards, whereas the target set from 2017 to 2018 was 100,000 provided support in securing land for the construction of additional shelters by the Shelter/CCCM Sector as part of efforts to decongest the IDP camp in Monguno LGA of Borno State.

The Housing, Land and Property Sub-Sector Working Group provided support in securing land for the construction of additional shelters by the Shelter/CCCM Sector as part of efforts to decongest the IDP camp in Monguno LGA of Borno State.

The Mine Action Sub-Sector Working Group reported that the month of November saw an increase in the number of civilians being abducted by armed groups and used to carry IED vests into populated areas.

Way forward: A participatory assessment exercise was conducted in Borno and Yobe states in both host communities and IDP camps. Series of events commemorating the 16 Days of Activism against Gender-Based Violence were designed to continue raising awareness on GBV issues.

The Housing, Land and Property Sub-Sector Working Group has developed a security of tenure verification guide and procedure for the recovery of lost documents, for the use of IDPs, returnees as well as humanitarian actors.

The Mine Action Sub-Sector Working Group conducted Risk Awareness sessions for 65 humanitarian workers working in areas potentially contaminated by explosive hazards.

Child Protection

Achievements: Since January 2018, a total of 722,188 children (336,622 girls and 385,566 boys) and 296,121 caregivers (149,269 women and 146,852 men) have been reached with child protection services. Overall, this represents 100% of the HRP target for 2018.

In November 2018, 33,753 children, adolescents and caregivers benefited from psychosocial support, life skills and livelihood support. The sub-sector reached a total of 623 unaccompanied and separated children and children with other protection risks (319 girls and 304 boys) with integrated case management services. Of these, 88 children (29 girls and 59 boys) were reunified with their caregivers and 228 children (98 girls and 130 boys) were placed in alternative care and received follow-up visits. A total of 187 children (17 girls and 170 boys) associated with armed groups were reunified with their caregivers.

The Child Protection Sub-Sector Working Group (CPSWG) in Borno state completed mapping for referral pathways for Bama (Banki), Damboa, Dikwa, Gwoza, Kala/Balge, Konduga, Kukawa, Mafa, Maiduguri M.C., Mobbar and Ngala LGAs. Mapping in Chibok, Monguno, Jere and Magumeri LGAs is ongoing. These referral pathways will be shared with child protection and key actors from other sectors for more efficient case management. The CPSWG also concluded the reconstitution of its Strategic Advisory Group for 2019 and commenced the process for selection of the NGO co-lead. This process is expected to be concluded in early 2019.

Way forward: Between December 2018 and January 2019, the CPSWG will conduct a rapid assessment on the situation of children living in the street in Maiduguri with the aim of gathering information on the background and needs of the children. This will inform planning and implementation of interventions to withdraw the children from the streets.

Gender-based Violence

Achievements: In November, GBV partnership under the leadership of the Borno State Ministries of Women Affairs and Social Development, marked the 16 Days of Activism Campaign "Breaking the Silence to End to GBV". Partners scaled up engagement with leaders and communities through sensitization on GBV/SEA principles. In Borno State, a series of activities were kicked off at an official launch event, officiated by the office of the First Lady of Borno State on 27th November 2018 in Maiduguri. Likewise, GBV partners across the affected states of Adamawa and Yobe held a series of activities to launch the two-week long campaign.

This year, GBV partners demonstrated a better understanding of the GBV protection situation and needs. In November, partners together reached 102,149 (43,130 women, 28,196 girls, 17,896 men and 12,927 boys) individuals with various interventions. 5,880 individuals received specialised support including case management, psychosocial support, medical care, while 1,723 women and girls received material support such as dignity kits. 3,307 individuals accessed a range of services through women and girls friendly spaces. 84,698 individuals were sensitized on GBV/SEA principles and engaged in community activities in relation to GBV prevention and 5,786 individuals were trained in different skills for socio-economic empowerment. 755 frontline responders (specialists and non-specialists) benefitted from training and capacity building initiatives on various components of GBV and PSEA.

Way forward: In December, the sub-sector will continue to raise community and stakeholder awareness and galvanize support to end gender-based violence. Activities have been organized to take place both in Maiduguri and in deep field locations, which will be finalized with joint activities to mark International Human Rights Day on 10th December 2018. The sub-sector will also engage in the validation of findings from the Protection of Children in Conflict assessment conducted in Borno State. As the year comes to an end, GBV partners will take stock of interventions and progress jointly made in reaching the targets for 2018 and strategize collectively for 2019, in preparation for implementing 2019 planned activities of the multi-year HRP.

MONTHLY TRENDS (Individuals reached)

MONTHLY TRENDS (Individuals reached)

OVERVIEW BY SECTOR, OBJECTIVES AND INDICATORS

1: Conflict-affected children, adolescents and caregivers receive quality protection services, including psycho-social care, life skills and livelihoods support to enhance their resilience to cope with the protracted crisis.

Number of children, adolescents and caregivers benefitted from psycho-Social Support, life skills and/or livelihood support

Number of community members and caregivers of conflict affected children who benefit from child care and child protection information

Number of children, adolescents and caregivers benefiting from mine-risk education.

2: Children facing protection risks (violence, neglect, abuse and family separation) receive integrated case management and referral to specialised services.

Number of children facing protection risks (family separation, violence, neglect, abuse) who received integrated case management services.

Number of Unaccompanied and separated children reunified with their families

Number of Unaccompanied, separated and children with other protection risks who have been placed in alternative care and/ or follow up have been made

Number of children and adolescents referred to legal services, nutrition services, specialized health services and other specialized support

3: Grave violations against children are monitored and reported; and children and adolescents who have suffered from such violations, including those formerly associated with armed groups or those returning from captivity, are supported to successfully reintegrate into their communities.

Number of children and adolescents suffering from grave child rights violations, including those formerly associated with armed groups or returning from captivity, who benefited from socio-economic assistance to successfully reintegrate into their communities.

Number of children, adolescents and adults reached through awareness raising campaign on grave violations against children and women

Number of children, adolescents and women who are survivors of conflict related sexual violence who benefit from quality survivor centred GBV services
