## Figure Analysis – Displacement Related to Conflict and Violence

### CONTEXT

Armenia has been involved in a conflict with Azerbaijan over the disputed region of Nagorno-Karabakh and seven surrounding districts, which are de facto controlled by the self-declared Nagorno-Karabakh Republic, but recognised as being part of Azerbaijan. Tensions between the two countries remain high. Little data is available regarding the number of people still displaced today by the violence.

New displacements	Total number of IDPs	Partial or unverified solutions	
		Number of IDPs who have made partial progress towards a durable solution	Number of IDPs whose progress towards durable solutions cannot be verified
No data available	No data available	No data available	8,400 (As of 2004)
<i>This corresponds to new instances of internal displacement having occurred in 2018.</i>	<i>This corresponds to the total number of individuals living in internal displacement as of 31 December 2018.</i>	<i>This corresponds to the number of IDPs whom our data providers have identified as having returned, resettled or locally integrated in 2018 and for whom the evidence obtained by IDMC suggests that progress toward durable solutions is only partial given their living conditions. In a few instances this number may refer to movements rather than people.</i>	<i>This corresponds to the number of IDPs whom our data providers have identified as having returned, resettled or locally integrated in 2018 but for whom there is no available evidence to corroborate progress toward durable solutions. In a few instances this number may refer to movements rather than people.</i>

### NUMBER OF IDPS WHOSE PROGRESS TOWARDS DURABLE SOLUTIONS CANNOT BE VERIFIED

*This corresponds to the number of IDPs whom our data providers have identified as having returned, resettled or locally integrated in 2018 but for whom there is no available evidence to corroborate progress toward durable solutions. In a few instances this number may refer to movements rather than people.*

#### Sources and methodologies

This caseload is based on an IDP Mapping Survey conducted by the Norwegian Refugee Council (NRC) and the Republic of Armenia's State Department for Migration and Refugees published in 2004.

#### Main caveats and monitoring challenges

Due to the lack of information on this population, we cannot confirm whether they achieved a durable solution or not.

**IDMC figure and rationale**

According to an IDP mapping survey conducted by NRC and the Republic of Armenia State Department for Migration and Refugees, published in 2004, there were about 8,400 IDPs in Armenia as result of the conflict. This report also mentions that the status of these people was uncertain. In the absence of further evidence or documentation regarding this caseload, IDMC includes this caseload as part of the unverified solutions category.

**Significant changes from last year**

No significant changes to the figure were identified by IDMC.
