KEY DEVELOPMENTS

USG Announces \$407 Million in Additional Funding for the Venezuela Regional Crisis

At the June 17 Government of Canada-hosted *International Donors' Conference in Solidarity with Venezuelan Refugees and Migrants*, U.S. Ambassador to the UN Linda Thomas-Greenfield announced nearly \$407 million in additional U.S. Government (USG) humanitarian funding to respond to the Venezuela regional crisis, including humanitarian assistance inside Venezuela. The funding—comprising approximately \$156 million from State/PRM and nearly \$251 million from USAID/BHA—will enable non-governmental organizations (NGOs) and UN agencies to continue providing various types of humanitarian assistance to vulnerable populations across the region. The additional funding builds on ongoing programs for Venezuelans and host communities throughout the region, and supports the provision of emergency food assistance—including vouchers and direct cash transfers to purchase food in local markets—and education, health, protection, shelter, and water, sanitation, and hygiene (WASH) assistance. The funding will also increase USG support for humanitarian coordination and logistics for the response within Venezuela, where international and local relief organizations are working to provide life-saving assistance, including emergency food supplies and health and WASH services, to mitigate the impact of the coronavirus disease (COVID-19) pandemic. Since 2017, the USG has provided more than \$1.4 billion in humanitarian funding for the Venezuela regional crisis response.

UN Releases 2021 Venezuela HRP; Relief Actors Continue Efforts to Procure COVID-19 Vaccines

The UN Office for the Coordination of Humanitarian Affairs (OCHA) released the 2021 Humanitarian Response Plan (HRP) on June 17, requesting more than \$708 million for Venezuela to continue providing multi-sector humanitarian assistance to approximately 4.5 million people through the end of 2021. The HRP calls for increased efforts to guarantee humanitarian access in Venezuela, prioritizes assistance in the health, nutrition, food security, protection, shelter, and WASH sectors, and advocates improved access to essential services throughout the country, including education, electricity, and potable water. The HRP also discusses the effects of the COVID-19 pandemic in Venezuela, which has exacerbated existing humanitarian needs and limited livelihood opportunities among vulnerable households. OCHA notes that UN agencies and other humanitarian actors aim to support the deployment of COVID-19 vaccines through the global COVAX initiative, as well as bilateral vaccine donations. However, relief and health organizations have expressed concern over the equitable distribution of vaccines due to the lack of a finalized National Deployment and Vaccination Plan.

WFP Establishes Operations in Venezuela Following April Visit to Caracas

On April 19, a delegation from the UN World Food Program (WFP) met with Venezuela's Nicolás Maduro and other Maduro regime officials to sign a memorandum of understanding (MoU) that allows WFP to establish humanitarian operations inside Venezuela, provide critically-needed food assistance throughout the country, and implement activities in accordance with the humanitarian principles of humanity, neutrality, impartiality, and operational independence. Additionally, while in Venezuela, WFP Executive Director David Beasley and WFP representatives met with Interim President of Venezuela Juan Guaidó and officials from the interim Government of Venezuela, other UN agencies, NGOs, and ambassadors from key donor countries who stressed the importance of reducing household-level food insecurity in Venezuela. The UN agency plans to provide food assistance to nearly 185,000 children via its school feeding program by the end of 2021 and gradually scale up food assistance to reach approximately 1.5 million children in Venezuela by June of 2023. As of 2019, approximately 9.3 million

people in Venezuela—more than 32 percent of the country’s population—were moderately or severely food-insecure, according to WFP. Additionally, WFP plans to support the Logistics Cluster—the coordinating body for humanitarian logistics activities, comprising UN agencies, NGOs, and other stakeholders—to implement logistics activities that facilitate humanitarian operations throughout the country.

Governments of Brazil, Colombia, and Ecuador Aim to Integrate Venezuelans

On May 5, the Government of Colombia (GoC) launched the first phase of registration for Temporary Protected Status (TPS) in Colombia, which includes virtual enrollment via a GoC-administered website or mobile application. Venezuelans who acquire TPS will formalize their legal status in Colombia and gain access to public services, including education, health care, formal employment, and national banking institutions, for up to 10 years while they apply for long-term residency. GoC officials have also established more than 100 in-person sites throughout the country to support registrants. As of June 16, approximately 1 million people had initiated the registration process on the GoC’s TPS website. USAID/BHA and State/PRM partners, including Save the Children Federation (SCF), the Office of the UN High Commissioner for Refugees (UNHCR), and WFP, have been coordinating with the Interagency Group for Mixed Migration Flows (GIFMM)—a group of NGOs and UN agencies in Colombia supporting the coordination of the nationwide humanitarian response to migration—and *Migración Colombia*, the GoC’s migration authority, to support the TPS registration process by providing internet access to registrants, clarifying required documentation, and implementing fraud prevention measures. Separately, on June 2, the GoC announced that it had officially reopened the Colombia–Venezuela land border after closing it for more than a year in an effort to limit the spread of COVID-19. *Migración Colombia* is reopening the border gradually over the coming months in accordance with set schedules and protocols at official crossing points, and the agency is expected to impose a daily limit on the number of individuals allowed to enter Colombia.

Meanwhile, at the June 17 donor conference, President of Ecuador Guillermo Lasso reiterated the Government of Ecuador (GoE)’s commitment to formalizing the legal status of Venezuelans who lack a valid migration status in the country. President Lasso emphasized the need to establish a comprehensive migration policy that safeguards the rights and legal status of Venezuelan migrants in Ecuador, indicating that the GoE would coordinate with UN agencies to integrate Venezuelans. During a May 23–25 visit to Ecuador, Ambassador Thomas-Greenfield met with President Lasso and relief actors—including USG partners the International Organization for Migration (IOM), UNHCR, and WFP—to discuss the need for sustained humanitarian assistance and integration support for Venezuelan migrants in Ecuador. In Brazil, since March 2018, the Government of Brazil (GoB) has resettled more than 50,000 Venezuelan migrants from Roraima State along the Brazil–Venezuela border to 675 cities throughout the country as part of Operation Welcome, the GoB-led effort to facilitate the integration of Venezuelans in Brazil. With support from State/PRM partners IOM and UNHCR, the GoB aims to accommodate the influx of Venezuelan migrants by improving access to long-term shelter solutions and sustainable livelihood opportunities.

U.S. GOVERNMENT RESPONSE

FOOD SECURITY

USAID/BHA assistance to date in FY 2021 aims to address acute food insecurity among migrants, refugees, and host community members residing in Colombia and Peru, as well as vulnerable Venezuelans inside Venezuela. USAID/BHA-funded emergency food assistance—implemented through Solidarités International in Colombia and WFP in Colombia and Peru—includes locally procured in-kind food assistance, hot meals, cash transfers for food, food vouchers, and complementary nutrition and WASH support. In Venezuela, USAID/BHA is funding NGO and UN partners for hot meals and in-kind food assistance. In total, these programs aim to reach more than 887,000 people in Colombia and Peru and more than 73,000 people in Venezuela using FY 2021 funds. USAID/BHA also contributes to coordination and capacity-building activities for food security actors that aim to improve the quality of humanitarian programming for the Venezuela regional crisis.

HEALTH

In FY 2021, USAID/BHA is providing nearly \$8.8 million to two NGOs—the Adventist Development and Relief Agency (ADRA) and Americares—to provide life-saving health care services to vulnerable Venezuelans and host community members in Colombia. USAID/BHA funding enables partners to distribute medical supplies, support service provision at health facilities, and train community health workers to address urgent health needs. With FY 2021 funding, USAID/BHA partners aim to provide nearly 434,000 people with improved access to health care services. Additionally, State/PRM partners—including IFRC, UNHCR, and Jesuit Refugee Service (JRS)—support essential health interventions for Venezuelans residing in 17 countries, including Brazil, Colombia, Ecuador, and Peru.

WASH

In FY 2021, USAID/BHA and State/PRM are supporting WASH programming to address the needs of vulnerable Venezuelans and to prevent the spread of COVID-19 and other communicable diseases. State/PRM partners implement WASH activities that assist Venezuelans residing outside Venezuela, including WASH measures to mitigate the risk of COVID-19 infection. With FY 2021 funding, State/PRM is supporting the UN Children's Fund (UNICEF) to reach nearly 960,000 beneficiaries across Brazil, Colombia, and Ecuador. In addition, USAID/BHA is providing more than \$12 million in FY 2021 funding to several relief agencies to implement critical WASH activities inside Venezuela, which include providing personal protective equipment and training local health care workers to respond to cases of COVID-19 in Venezuela, conducting hygiene awareness sessions, rehabilitating WASH infrastructure in schools, and installing handwashing stations at community kitchens.

\$58.4 Million

In USAID/BHA
FY 2021 MPCA
funding in Colombia

ECONOMIC RECOVERY AND CASH ASSISTANCE

With more than \$58 million in FY 2021 funding for multipurpose cash assistance (MPCA), USAID/BHA partners are distributing cash assistance through prepaid debit cards and cash transfers to vulnerable households in Colombia. MPCA transfers enable recipients to individually prioritize needs such as food, health care, essential household items, school supplies, and shelter, as well as provide a means to pursue income-generating opportunities.

State/PRM partners in Brazil, Colombia, Ecuador, and Peru support economic recovery by strengthening livelihood opportunities and socioeconomic integration among vulnerable Venezuelans, providing training and resources to enable the adoption of sustainable entrepreneurship and employment strategies. State/PRM partners provide Venezuelans with registration and technical assistance for work permits; employment and vocational training; language training; technical skills certifications; business development training; and the provision of seed capital and cash assistance via bank transfers, prepaid cards, and mobile money platforms.

PROTECTION

State/PRM supports seven partners to address protection concerns among nearly 1.3 million vulnerable Venezuelans residing in Venezuela and across the region, particularly along the Colombia–Venezuela border. State/PRM-supported protection activities aim to increase access to and support the provision of protection services, including gender-based violence prevention and case management, child-friendly spaces, community-based mental health and psychosocial support, and legal assistance. State/PRM partners also work with the broader humanitarian community across the region to support advocacy efforts with local and national authorities and promote the delivery of protection services in areas with significant humanitarian access constraints.

CONTEXT IN BRIEF

- Deteriorating economic and political conditions—characterized by hyperinflation—in the Bolivarian Republic of Venezuela have decreased households’ access to food, medicine, and livelihoods; contributed to increasing humanitarian needs; and triggered an influx of Venezuelans into countries across LAC, primarily to Brazil, Chile, Colombia, Ecuador, and Peru. By June 2021, approximately 5.6 million Venezuelans were living outside of Venezuela, according to the Regional Interagency Coordination Platform for Refugees from Venezuela (R4V), led by IOM and UNHCR.
- The population influx continues to strain available services, especially in border areas of Brazil, Colombia, Ecuador, and Peru. Recent assessments indicate that food, health care, and WASH support are among the most urgent humanitarian needs among vulnerable populations, including Venezuelans, Colombian returnees from Venezuela, and host communities in border regions. The outflow of people from Venezuela also contributes to increased public health concerns throughout the region, particularly with regard to overburdened health care systems and the spread of COVID-19, as well as other infectious diseases.
- On April 16, 2018, USAID activated the Venezuela Regional Crisis RMT in Washington, D.C., to coordinate USG regional humanitarian efforts. On June 7, 2018, USAID activated the Venezuela Regional Crisis DART to support delivery of life-saving assistance across the region.
- In addition to supporting ongoing regional response activities, USAID/BHA and State/PRM staff members based throughout the region and in Washington, D.C., are monitoring the humanitarian situation in close coordination with relevant host governments, donor governments, NGOs, and UN counterparts.

PUBLIC DONATION INFORMATION

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations. A list of humanitarian organizations that are accepting cash donations for disaster responses around the world can be found at interaction.org.
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, and warehouse space); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietarily, and environmentally appropriate assistance.
- More information can be found at:
 - USAID Center for International Disaster Information: cidi.org
 - Information on relief activities of the humanitarian community can be found at reliefweb.int.

USAID/BHA bulletins appear on the USAID website at [usaid.gov/humanitarian-assistance/where-we-work](https://www.usaid.gov/humanitarian-assistance/where-we-work)
