IDPs with access to CFM mechanism including for PSEA cases	120,227	60,882

Baseline data

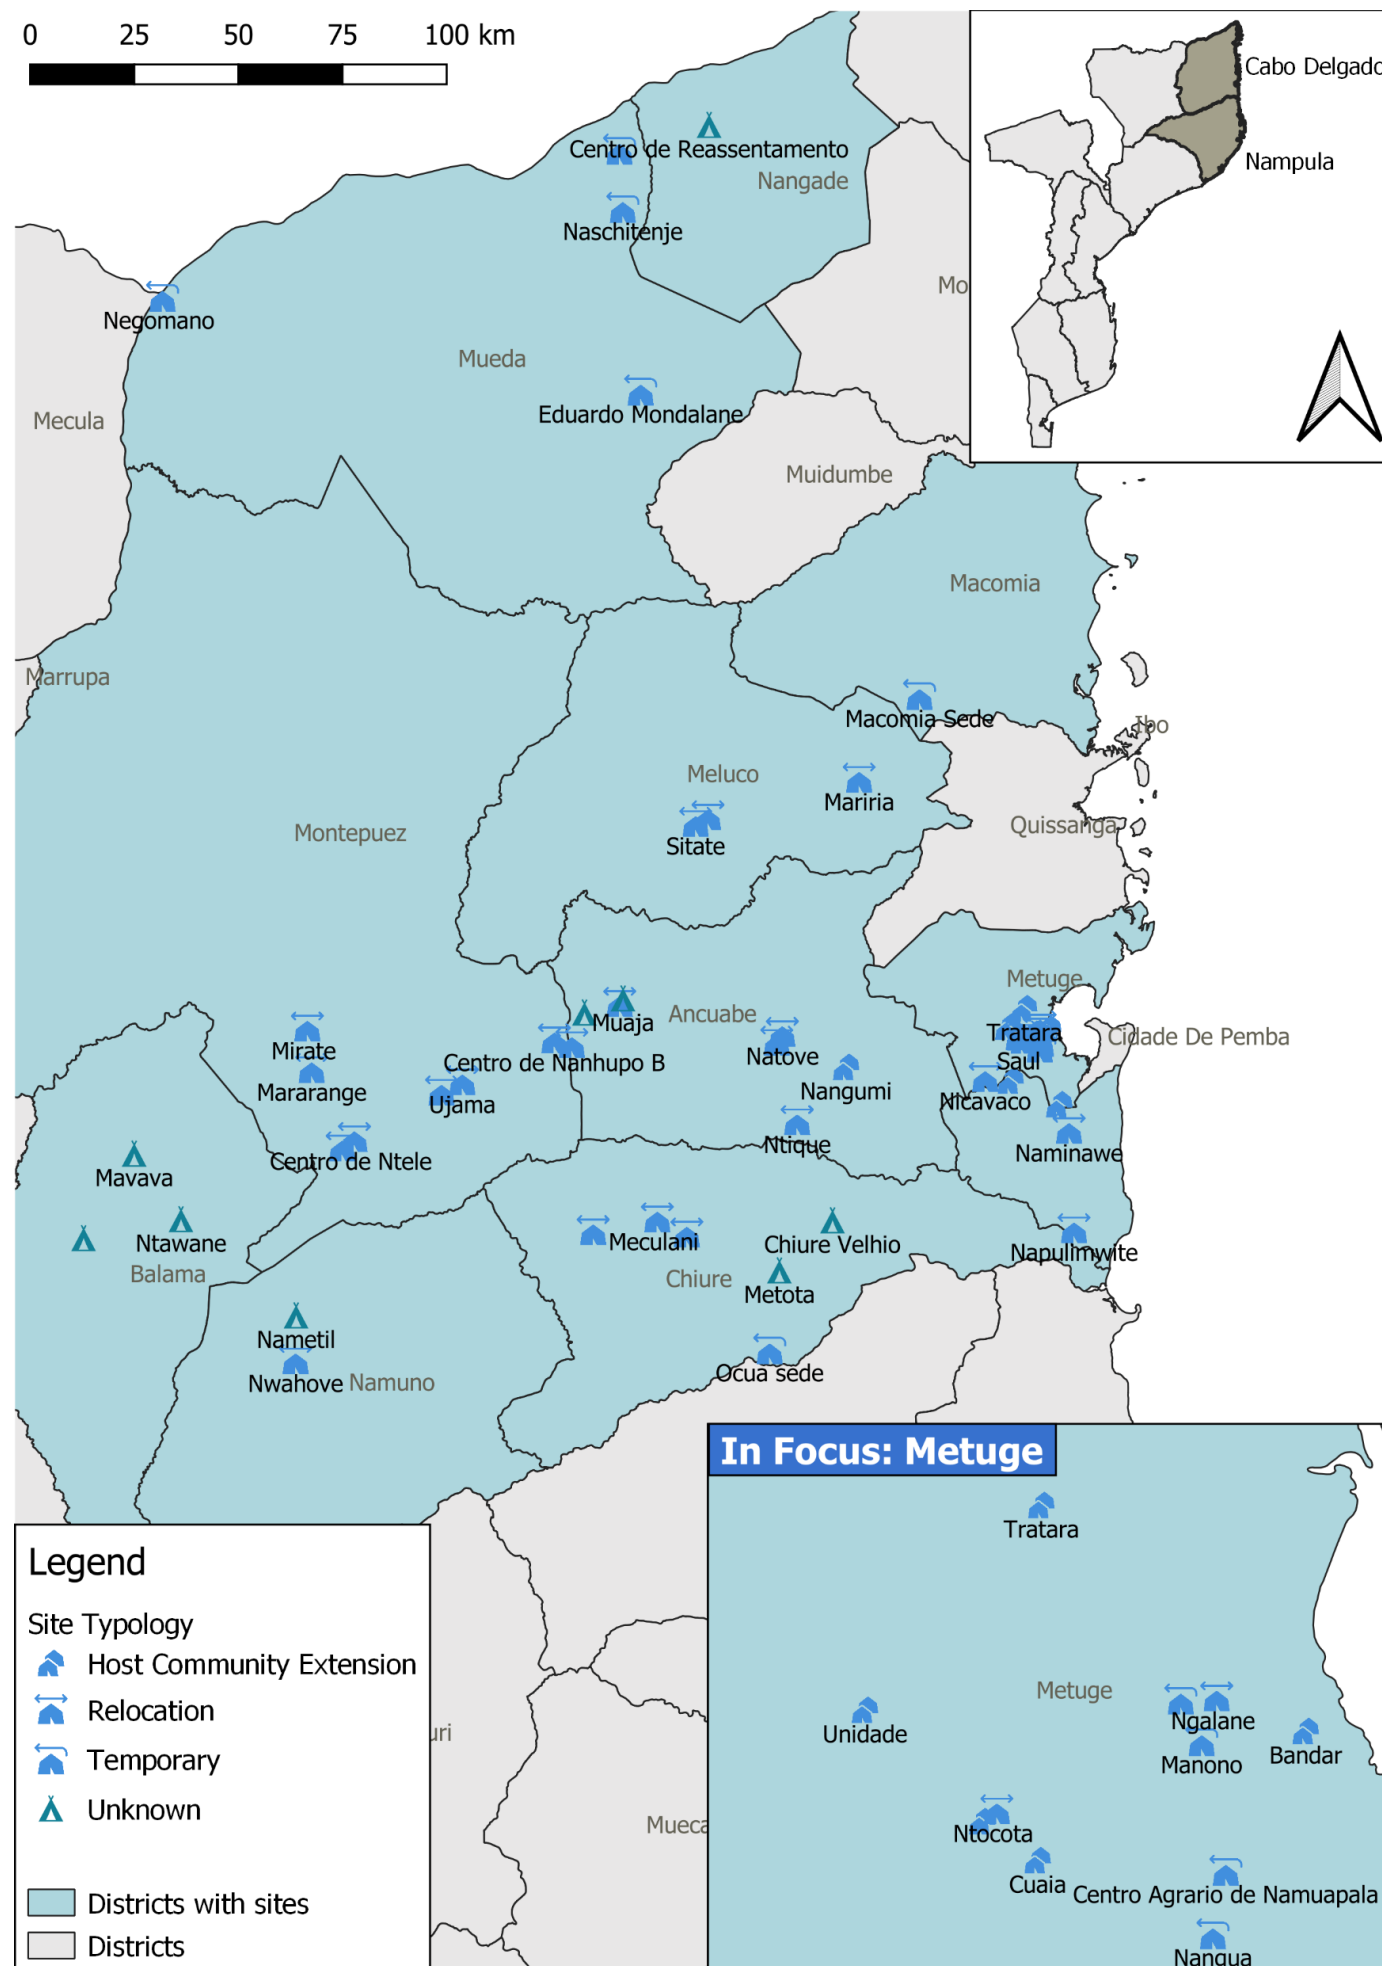

539,000 People in need

351,000 People targeted

\$ 7.3 M Financial requirements

4 Partners

29 Sites with CCCM mechanism

Community engagement

One of the central aims of CCCM is to enable affected populations to play an active role in the decision-making processes that affect them. CCCM activities will ensure populations have the space to voice their opinions, participate in service delivery and get direct feedback from service providers.

Focus group discussions were held in Ngalane, Ntocota, and Marrupa to inform the set up of women's committees for CCCM. These committees will strive to ensure that concerns raised by women are heard and support is identified for key areas of concern.

The CCCM partner in Montepuez conducted awareness raising activities both door-to-door and with focus groups of beneficiaries (35 HHs reached every day within the month of June, with a total of approx. 700 HHs reached in June).

During the month of June a total of 208 cases were filed, for a total of 435 cases. Out of the 208 cases received, 54 per cent were complaints, 42 per cent request for assistance, 2 per cent request for information and 2 per cent feedback.

In Montepuez, thanks to complaints gathered at site level through the CFM and liaison with Committees, an additional 45 vulnerable families were identified for specific assistance.

Site development

Two additional alpendres are being constructed in Montpuez sites in Ntele and in Nanhupo B site. The alpendre should work as a gathering point for the committees and a safe space where to discuss issues pertaining the life of the site and common

1753 households were relocated from temporary sites or host communities to planned relocation sites with improved living conditions and better access to services.

In order to support the local authorities to manage of the influx of displaced people to Montepuez, CCCM partners have been doing site clearance, and plot demarcation and allocation in Montepuez, in the sites of Ujama (798), Mararanje (548), and Mirate (355), totalling 1,737 plots.

Coordination and Information management

CCCM partners provide site level coordination and information so that service providers responding in sites and settlements can ensure sustained emergency responses for affected populations that meet minimum standards without duplication of activities.

CCCM has maintained a daily presence in the Pemba Transit Center, monitoring arrivals, departures and services. This enables the team to alert partners to the needs, such as NFI and WASH kits for new arrivals.

The CCCM cluster keeps an updated Master Site list with names and locations of known IDP sites across the region.

Coordination meetings with service providers working in displacement sites is held every Tuesday

Site monitoring is being conducted by CCCM teams across sites in Cabo Delgado (Metuge, Montepuez, Chiure, Ancuabe) as well as particular sites in Nampula province.

Partners coordination meetings are taking place twice per month with all implementing partners in 25 de Junho

Disability Inclusion

Disability inclusion committees have been set up in Ngalane and Ntocota and are meeting on a regular basis. The committee gives members a chance to discuss with CCCM and other partners and suggest ways to improve accessibility and service delivery in the sites.
