

Relocation Site: Nicuapa, Montepuez

The **Nicuapa** Relocation Site has been receiving Internally Displaced Persons (**IDPs**) since September 2020. IDPs are mainly from **Muidumbe, Mocimba da Praia, Macomia and Quissanga**. The Site is currently at its maximum hosting capacity. Traditional community governance structures (district representations) are in place supported by the local authorities. Sector committees are also established.

UNHCR in partnership with **AVSI** works with **local authorities**, the CCCM Cluster, partners, displaced and host communities to enhance inclusive **community participation**, site level **coordination**, assess, and identify gaps, to ensure displaced families have **access to services** and live with **dignity**, while **promoting peaceful coexistence** and social cohesion with host communities.

POPULATION¹: 13322
HH: 4127

KEY GAPS AND CHALLENGES:

- Temporary and transitional **shelters** that are **susceptible to damage** during the rainy season.
- Absence of **income-generating** opportunities for the IDPs.
- Distance from the local market** and transport challenges among the IDPs to access the local market.
- Lack of education facilities** is the second main concern (second after food) in the site, recorded through the CFM mechanism.
