The aim of the Cluster is to improve the living conditions and protection of IDPs in sites and settlements and ensure equal access to services, with a clear focus on moving toward attaining durable solutions.

Strategic indicators **Target Achieved**

IDPs in sites **266,246**

IDPs with access to site management **120,227**
300,000

IDPs with access to CFM mechanism including for PSEA cases **120,227**
401,520

Baseline data

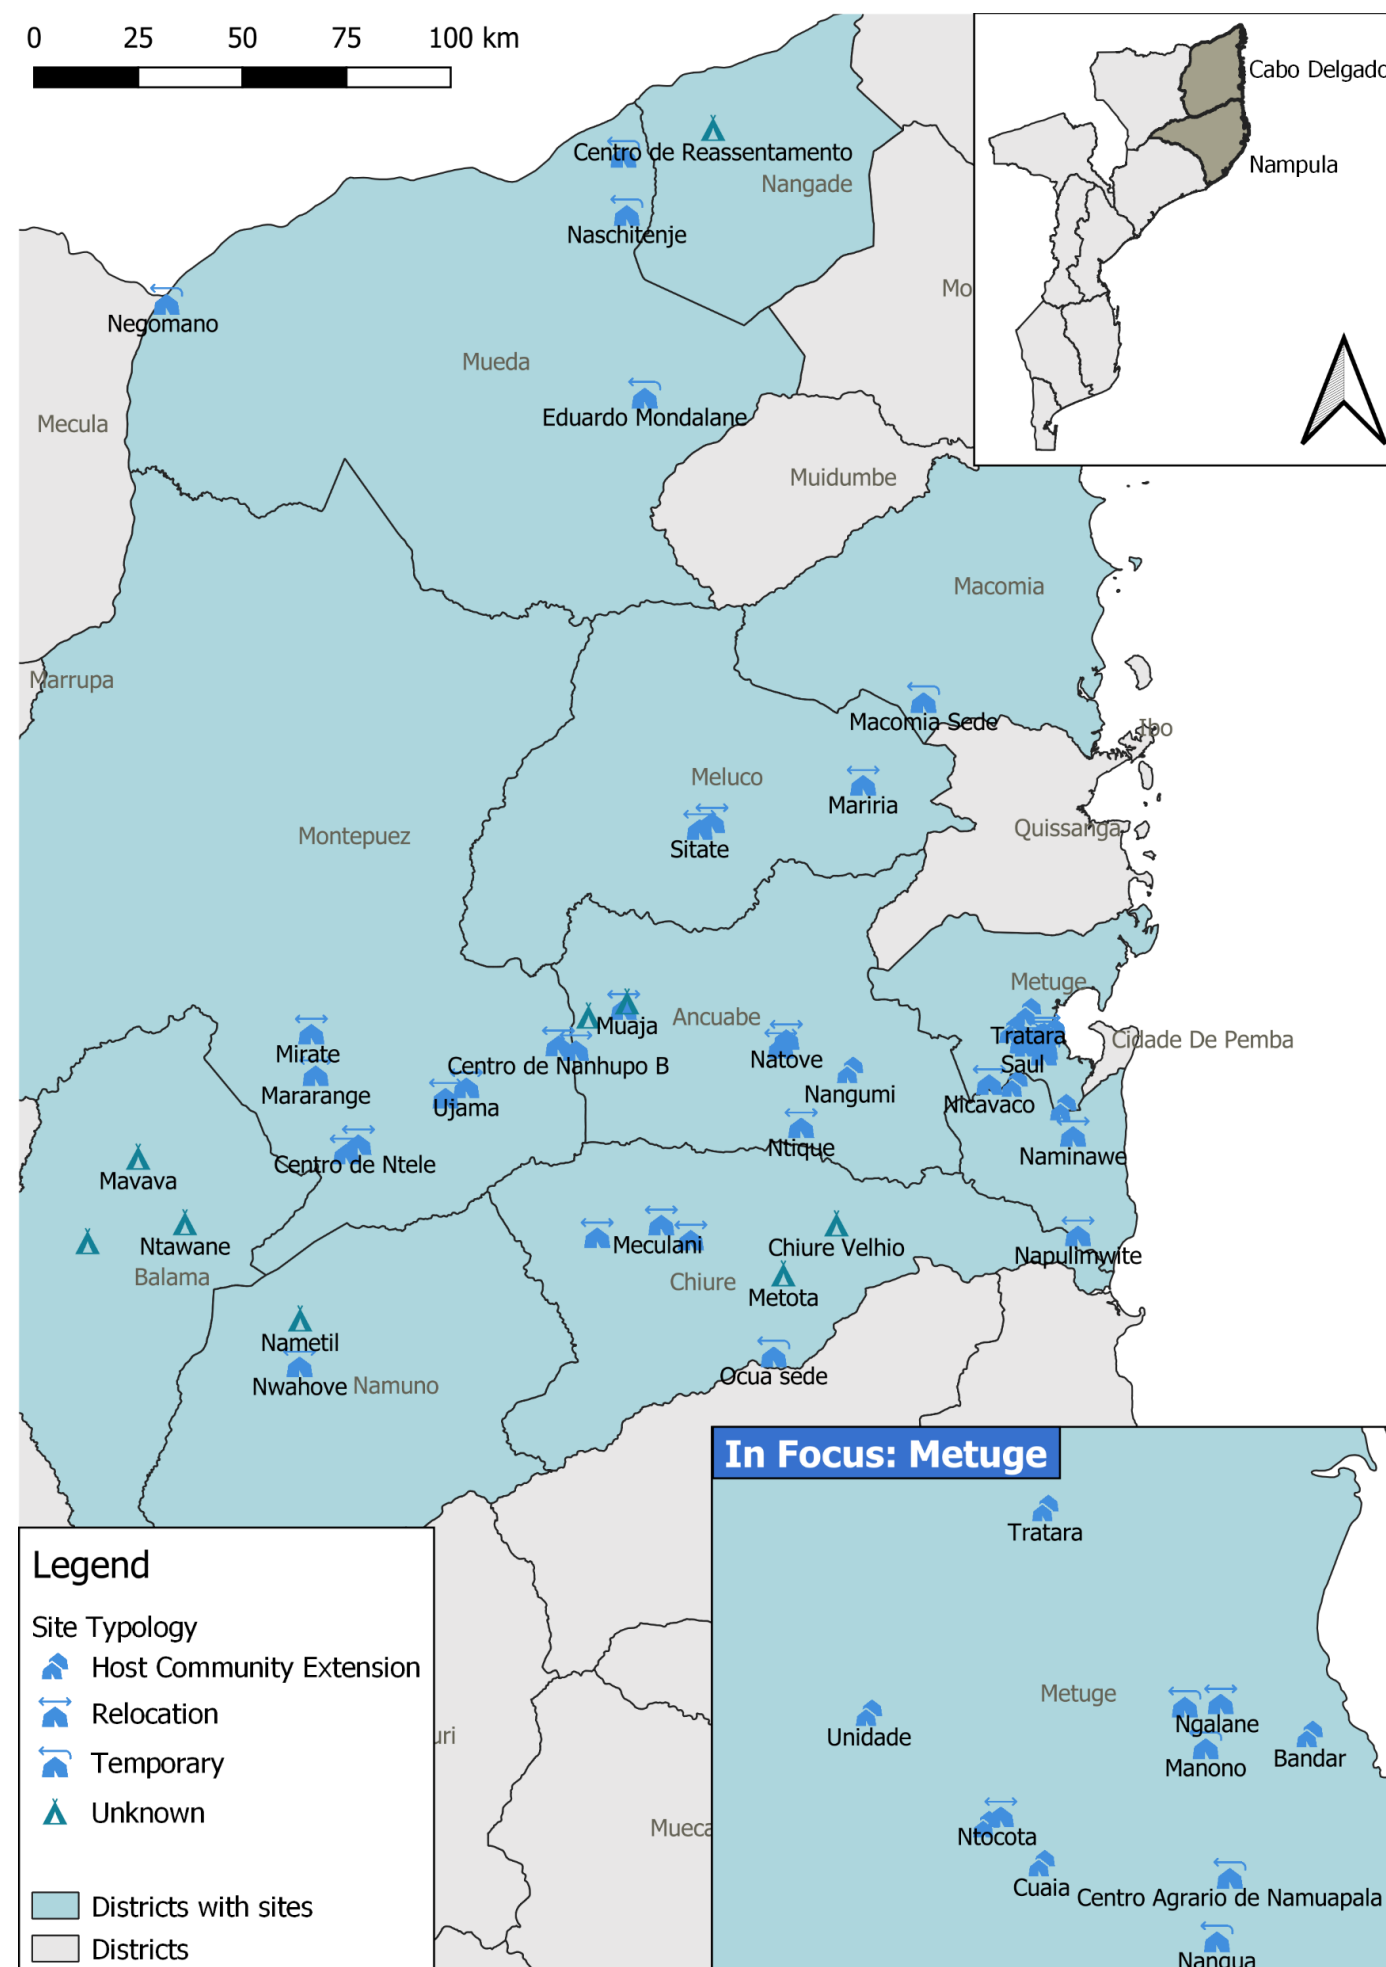

622,108 People in need

401,520 People targeted

\$ 7.3 M Financial requirements

4 Partners

45 Sites with CCCM mechanism

Community engagement

During the month of March, IOM CCCM facilitated 33 committee meetings at site level across Ancuabe, Chiure, Metuge and Montepuez districts in Cabo Delgado. 28 site maintenance committees have been created in the four districts and 2 additional women's committees have been activated in Corrane (Meconta, Nampula) and Chimoio. Fire safety information sharing, and awareness sessions have been conducted in 10 sites. The IOM CCCM and Protection Cluster teams also conducted an intention survey targeting IDPs in Pulo.

In Nandimba (Mueda), the Solidarites International CCCM team conducted Focus Group Discussions in order to understand the IDP community needs and set up an adapted Complaints and Feedback Mechanism in the site.

During the month of March, the Complaint and Feedback Mechanism has been expanded to 33 sites. 219 cases were filed for a total of 1756 cases and recording a stable data collection trend compared to the previous months.

In the reporting period, a total of 219 cases were filed, for a total of 1756 cases. Out of the 219 cases received, 62% were complaints, 32% request for assistance and 5% request for information.

A total of 76 per cent of the cases received in March were closed within the same month. Of this 68 per cent were closed after referral and 32 per cent were closed at site.

Most of the cases were related to the NFI sector (33%) and FLS (31%) followed by Shelter (18%).

Coordination and Information management

CCCM partners provide site level coordination and information so that service providers responding in sites and settlements can ensure sustained emergency responses for affected populations that meet minimum standards without duplication of activities.

The CCCM cluster keeps an updated Master Site list with names and locations of known IDP sites across the region.

Coordination meetings with service providers working in displacement sites have been held on a bi-weekly basis in Metuge and Montepuez. The IOM CCCM Team also carried out Need Assessment in Nampula in response to cyclone Gombe. The assessments have been carried out in 7 sites in Namialo district, 12 sites in Monapo district, Corrane relocation site, Meconta district.

IOM is also conducting WaSH assessment in sites in Ancuabe, Chiure, Metuge and Montepuez. During the month of March, a total of 5 sites were covered by the assessment

Solidarites International is supporting SDPI with the coordination of INGO activities at the level of Mueda. The following coordination activities are now in place:

- Bi-monthly service providers meeting with SDPI (took place on 22/02 and 16/03)
- Sharing of weekly planning of activities in sites

Site development

During the reporting period IOM CCCM has been working together with SDPI on the site development of two sites: Pulo relocation site in Metuge and Chimoio relocation site in Montepuez.

- Pulo (Metuge): a total of 13,000 linear meters of road cleaned and 10 blocks cleared.
- Chimoio (Montepuez): a total of 180 plots cleaned and 5000 linear meters of roads open

IOM CCCM also completed the construction of 8 Community Communication Centers (CCC) and 8 camp management center (CMC) in Metuge and Montepuez. The construction of additional 2 CCC and CMC started in Ancuabe.

Solidarites International supported SDPI in the identification and the relocation of households from the Eduardo Mondlane transit center to the Nandimba site as a key priority. An estimated 800 households are not able to finish building their shelters in Nandimba because of the lack the tarpaulin needed for shelter roofing. SI coordinated with partners to organize the distribution of shelter/NFI kits to these households with the following results:

- NRC was able to distribute 235 Shelter/NFI kits on 17/03.
- SI shelter team distributed 194 tarps on 29/03.

The location of a second water point in Nandimba was identified along with SDPI and its finalization is planned for the month of April.

Relocation activities

Linked to site development activities, CCCM supports local authorities and partners to safely relocate IDPs from congested host communities and flood prone areas.

The CCCM Cluster supports the Government of Mozambique (GoM) in ensuring standards are respected before, during and after relocation. Cluster partners contribute to these operations through the provision of logistics support and guidance. Moreover, community engagement and sensitization is implemented alongside the relocation activities in each phase of the IDP movement.

In December, the IOM CCCM Team carried out community engagement activities and provided logistic support to the government for the following relocations and plot allocations:

- 225 families relocated from the host community to Natove relocation site in Ancuabe district
- 30 families relocated from Meluco site to Pulo relocation site in Metuge district.
