

Venezuela Regional Crisis – Complex Emergency

JUNE 14, 2022

SITUATION AT A GLANCE

- President Biden announces additional humanitarian and development funding for the Venezuela regional crisis at the Summit of the Americas on June 10.
- Price increases for agricultural inputs and imported food commodities due to the GoRF invasion of Ukraine threaten to exacerbate food insecurity in LAC.
- The GoE issues an executive decree on June 1 to begin a second regularization process for Venezuelan migrants and refugees who entered Ecuador through formal entry points.
- WFP reaches nearly 119,000 people with emergency food assistance via school feeding programs in Venezuela in April.

TOTAL U.S. GOVERNMENT HUMANITARIAN FUNDING For the Venezuela Regional Crisis Response in FY 2022	USAID/BHA ¹	\$171,018,800
	State/PRM ²	\$109,574,551
Total		\$280,593,351

For complete funding breakdown with partners, see detailed chart on page 6.

² U.S. Department of State's Bureau of Population, Refugees, and Migration (State/PRM)

KEY DEVELOPMENTS

President Biden Announces Additional Humanitarian and Development Funding for the Venezuela Regional Crisis

U.S. President Joseph R. Biden announced approximately \$314 million in new humanitarian and development funding at the Summit of the Americas on June 10, including more than \$171 million in humanitarian funding from USAID/BHA and nearly \$103 million in humanitarian funding from State/PRM to support life-saving assistance inside Venezuela, as well as for Venezuelan migrants, refugees, and host communities in the region. The funding also includes \$35.9 million in USAID Bureau for Latin America and the Caribbean (LAC) development funding for the Venezuela regional crisis and \$4.1 million in development funding for Central America.

The humanitarian funding is supporting non-governmental organizations (NGOs) and UN partners to provide emergency food assistance; health care; nutrition interventions; programming to prevent and respond to protection risks, such as gender-based violence (GBV) and human trafficking; and water, sanitation, and hygiene (WASH) assistance to vulnerable communities inside Venezuela, as well as humanitarian coordination and logistics support for relief actors operating in the country. Humanitarian funding included in the announcement also supports the provision of food assistance—including food kits, cooked meals, vouchers for food, and direct cash transfers to purchase food in local markets—and education, health, protection, shelter, WASH, and other assistance reaching Venezuelan migrants and refugees, as well as host communities, throughout several countries in the region. The announcement brings the total U.S. Government (USG) humanitarian assistance for the Venezuela regional crisis since FY 2017 to more than \$1.9 billion.

WFP Marks Anniversary of Establishing Operations in Venezuela; UNICEF and WFP Continue School Feeding Programs in Venezuela in April and May

More than one year following the April 2021 memorandum of understanding (MoU) between the Regime of Nicolás Maduro and the UN World Food Program (WFP), which allowed the UN agency to establish operations in Venezuela, WFP continues to provide critical food assistance in accordance with humanitarian principles across four states in the country. In April, the UN agency provided in-kind food assistance to nearly 119,000 children younger than six years of age, children with disabilities, and educational staff via school feeding programs in more than 1,000 schools in Barinas, Falcón, Trujillo, and Yaracuy states, representing a 40 percent increase compared with the approximately 85,000 people reached in January. The rations—comprising beans or lentils, rice, salt, and vegetable oil—aim to meet the caloric requirements of young children for one month. In addition, WFP advanced preparations to begin food distributions through school feeding programs in additional states in the coming months in coordination with local education officials. Overall, the UN agency aims to reach approximately 1.5 million school children with food assistance by the end of the school year in June or July 2023. Meanwhile, the UN Children’s Fund (UNICEF) reached nearly 82,000 children with school meals in more than 210 schools across 9 states in Venezuela from January to May.

Relief Actors, Including USG Partners, Reach 3.1 Million Venezuelan Migrants and Refugees, Host Community Members With Assistance in 2021

In response to persistent humanitarian needs resulting from the Venezuela regional crisis, relief actors—including USG partners—reached nearly 3.1 million Venezuelan migrant and refugees and host community members across LAC with humanitarian assistance in 2021, according to the Regional Interagency Coordination Platform for Refugees from Venezuela (R4V). This total includes 1.5 million people reached with emergency food assistance, 1.2 million individuals reached with life-saving health

care services, and 620,000 people reached with multipurpose cash assistance (MPCA). Relief actors also reached approximately 852,000 people with critical protection services, with partners working to reduce migrants and refugees' vulnerability to violence, exploitation, and abuse and bolster access to national protection systems by securing documentation, registration, and other legal stay alternatives.

GoRF Invasion of Ukraine Threatens to Exacerbate Food Insecurity in LAC

Supply chain disruptions and price increases caused by the Government of the Russian Federation (GoRF) invasion of Ukraine could exacerbate food insecurity in LAC, which is already heightened primarily due to coronavirus disease (COVID-19)-related restrictions, particularly among low-income households, including migrants and refugees, WFP reports. From December 2021 to March 2022, the number of people facing severe food insecurity across LAC increased from 8.7 million to 9.3 million, excluding Cuba and Venezuela, as record high global food commodity prices, continued inflation, and exhaustion of household coping strategies generated and/or compounded food needs. WFP projects that up to 13.3 million people could face severe acute food insecurity in LAC in the coming months if the conflict in Ukraine persists, representing a more than 50 percent increase compared with late 2021.

For example, in Colombia, while COVID-19-related restrictions and subsequent inflation had already increased food prices by an average of 23 percent from February 2021 to February 2022, increasing global prices for fertilizers and essential food commodities resulting from the February 24 GoRF invasion could further heighten food costs in the country, according to a recent UN Food and Agriculture Organization (FAO) and WFP assessment. Colombia imports an estimated 75 percent of its fertilizers—with approximately half coming from Belarus, Russia, and Ukraine—and approximately 28 percent of its food commodities. The assessment notes that increasing food prices and shortages of agricultural inputs will particularly affect low-income communities in the country, such as Venezuelan migrants and refugees. Meanwhile, in Venezuela, food security actors continue to express concern regarding the lack of accurate, comparable food security data amid humanitarian access constraints in the country. However, FAO and WFP project that persistent inflation, high food prices, and reduced purchasing power will continue to hinder access to food for vulnerable communities across Venezuela from June to December.

GoE Authorizes Second Regularization Process for Displaced Venezuelans

The Government of Ecuador (GoE) issued an executive decree on June 1 authorizing a second regularization process for Venezuelan migrants and refugees who have entered the country through an official immigration control point, allowing eligible individuals to register biometrics and, subsequently, apply for a two-year temporary residency visa in the country. The order follows a similar process conducted between 2019 and 2020, when the GoE issued tens of thousands of visas to Venezuelans. The new regularization process will allow individuals to use Venezuelan passports expired for up to five years, as well as Venezuelan *cedulas*—identification cards—for individuals who entered the country prior to August 2019, as proof of identity to register. The executive order allows the GoE Ministry of Interior three months to establish the biometric registration process and the GoE Ministry of Foreign Affairs four months to establish the regularization program. As of May, an estimated 514,000 Venezuelan migrants and refugees resided in Ecuador, though only a portion of those individuals entered the country through formal points, R4V reports.

Venezuelan Migrants and Refugees Face Barriers Accessing Education, Essential Services in Areas of Colombia, Peru

Venezuelan migrants and refugees continue to face discrimination and barriers accessing childcare, education, livelihoods, and other essential opportunities and services in neighboring countries, including

areas of Colombia and Peru, according to recent assessments by international NGOs Refugees International and USG partner Save the Children Federation (SCF). In Peru's La Libertad and Lima departments, an estimated 25 percent of Venezuelan migrant and refugee children are unable to attend school, largely due to insufficient space, lack of internet access, and arrival in the area after school enrollment had closed, SCF reports. In addition, 10 percent of surveyed children reported experiencing discrimination by school administrators due to their nationality, impeding enrollment. In response, SCF is advocating for education officials to ensure inclusion of migrant and refugee children in educational services, including by training school administrators and teachers on identifying and responding to discrimination.

In Colombia's Riohacha city, La Guajira Department, an estimated 47,000 Venezuelan migrants and refugees continue to face discrimination and challenges accessing livelihood opportunities and temporary protected status, which allows individuals to stay and work in Colombia for up to 10 years, Refugees International reports. Other vulnerable populations such as returned Colombians and the Wayúu—a binational Indigenous population living on both sides of the Colombia–Venezuela border—also face significant exclusion in the area. In addition, Venezuelan female-headed households face heightened exclusion from income-generating activities, prompting some women to utilize negative coping strategies exposing them to significant protection risks. In response, Refugees International is advocating the Government of Colombia to assess humanitarian conditions and ensure inclusion of vulnerable groups in social policies and programs, as well as reduce barriers for Venezuelan women to access livelihoods and critical social services, such as childcare.

KEY FIGURES

\$354 Million

In dedicated USAID/BHA emergency food assistance in FYs 2021–2022

\$40 Million

In dedicated FYs 2021–2022 USAID/BHA funding for life-saving health care programming

U.S. GOVERNMENT RESPONSE

FOOD SECURITY

USAID/BHA assistance aims to address acute food insecurity among migrants, refugees, and host community members residing in Brazil, Colombia, Ecuador, and Peru, as well as vulnerable Venezuelans inside Venezuela. USAID/BHA-funded emergency food assistance—implemented through NGOs such as the Adventist Development and Relief Agency (ADRA) and Caritas Brasileira in Brazil and SCF and World Vision in Peru, as well as WFP in Colombia, Ecuador, and Peru—includes food kits, cooked meals, cash transfers for food, food vouchers, and complementary nutrition and WASH support. In Venezuela, USAID/BHA is funding NGO and UN partners to provide cooked meals and in-kind food assistance. In total, these programs target approximately 1.5 million people in Brazil, Colombia, Ecuador, and Peru and more than 100,000 people in Venezuela. USAID/BHA also contributes to coordination and capacity-building activities for food security actors that aim to improve the quality of humanitarian programming for the Venezuela regional crisis.

HEALTH

USAID/BHA has provided more than \$40 million to NGO and UN partners in Colombia and Venezuela to provide life-saving health care services to vulnerable Venezuelans and host community members in FYs 2021 and 2022. USAID/BHA-supported projects continue to help partners distribute medical supplies, support service provision at health facilities, and train community health workers to address urgent health needs. With FY 2021

funding, USAID/BHA partners provided 674,000 people across the two countries with improved access to health care services, with interventions ongoing. Additionally, State/PRM partners—including the International Federation of Red Cross and Red Crescent Societies (IFRC), the Office of the UN High Commissioner for Refugees (UNHCR), and Jesuit Refugee Service (JRS)—continue to support essential health interventions for Venezuelans residing in 17 LAC countries, including Brazil, Colombia, Ecuador, and Peru.

349,000

People supported
with USAID/BHA-funded
WASH activities
in Venezuela in FY 2021

WASH

USAID/BHA and State/PRM continue to support WASH programming to address the needs of vulnerable Venezuelans and to prevent the spread of COVID-19 and other communicable diseases. State/PRM partners implement WASH activities that assist Venezuelans residing outside Venezuela, including WASH measures to mitigate the risk of COVID-19 infection. With FY 2021 funding, State/PRM supported UNICEF to reach nearly 960,000 beneficiaries across Brazil, Colombia, and Ecuador. In addition, USAID/BHA has provided more than \$40.3 million in FYs 2021 and 2022 funding to several relief agencies to implement critical WASH activities inside Venezuela, which include providing personal protective equipment and training local health care workers to respond to cases of COVID-19, conducting hygiene awareness sessions, rehabilitating WASH infrastructure in schools, and installing handwashing stations at community kitchens.

\$78.5 Million

In USAID/BHA
FY 2021 MPCA
funding in Colombia

ECONOMIC RECOVERY AND CASH ASSISTANCE

With more than \$78.5 million in FY 2021 funding for MPCA, USAID/BHA partners are distributing cash to vulnerable households in Colombia through prepaid debit cards and cash transfers. MPCA transfers enable recipients to prioritize needs such as food, health care, essential household items, school supplies, and shelter, as well as provide a means to pursue income-generating opportunities.

State/PRM partners in Brazil, Colombia, Ecuador, and Peru support economic recovery by strengthening livelihood opportunities and socioeconomic integration among vulnerable Venezuelans, providing training and resources to enable the adoption of sustainable entrepreneurship and employment strategies. State/PRM partners provide Venezuelans across the region with registration and technical assistance for work permits; employment and vocational training; language training; technical skills certifications; business development training; and the provision of seed capital and cash assistance via bank transfers, prepaid cards, and mobile money platforms.

PROTECTION

State/PRM and USAID/BHA support approximately 30 partners to address protection concerns among nearly 1.3 million vulnerable Venezuelans in Venezuela and across the region, particularly along the Venezuela–Colombia border and in the Caribbean where the protection space is especially

30

Number of USG partners that have implemented protection services with FY 2021 funding

limited. State/PRM-supported protection activities aim to increase access to and support the provision of protection services, including GBV prevention and case management, child-friendly spaces, community-based mental health and psychosocial support, and legal assistance. State/PRM partners also work with the broader humanitarian community across the region to support advocacy efforts with local and national authorities and promote the delivery of protection services in areas with significant humanitarian access constraints.

CONTEXT IN BRIEF

- Deteriorating economic and political conditions—characterized by hyperinflation—in the Bolivarian Republic of Venezuela have decreased households’ access to food, health care, and livelihoods; contributed to increasing humanitarian needs; and triggered an outflow of Venezuelans into countries across LAC, primarily to Brazil, Chile, Colombia, Ecuador, and Peru. By May 2022, more than 6.1 million Venezuelans were living outside of Venezuela, according to R4V, led by the International Organization for Migration (IOM) and UNHCR.
- The population influx continues to strain available services, especially in border areas of Brazil, Colombia, Ecuador, and Peru. Recent assessments indicate that food, health care, and WASH support are among the most urgent humanitarian needs among vulnerable populations, including Venezuelans, Colombian returnees from Venezuela, and host communities in border regions. The outflow of people from Venezuela also contributes to increased public health concerns throughout the region, particularly regarding overburdened health care systems and the spread of COVID-19, as well as other infectious diseases.
- On April 16, 2018, USAID activated the Venezuela Regional Crisis Response Management Team (RMT) in Washington, D.C., to coordinate USG regional humanitarian efforts. On June 7, 2018, USAID activated the Venezuela Regional Crisis Disaster Assistance Response Team (DART) to support delivery of life-saving assistance across the region.
- In addition to supporting ongoing regional response activities, USAID/BHA and State/PRM staff members based throughout the region and in Washington, D.C., are monitoring the humanitarian situation in close coordination with relevant host governments, donor governments, NGOs, and UN counterparts.

PUBLIC DONATION INFORMATION

- The most effective way people can assist relief efforts is by making cash contributions to humanitarian organizations that are conducting relief operations. A list of humanitarian organizations that are accepting cash donations for disaster responses around the world can be found at [interaction.org](https://www.interaction.org).
- USAID encourages cash donations because they allow aid professionals to procure the exact items needed (often in the affected region); reduce the burden on scarce resources (such as transportation routes, staff time, and warehouse space); can be transferred very quickly and without transportation costs; support the economy of the disaster-stricken region; and ensure culturally, dietarily, and environmentally appropriate assistance.

- More information can be found at:
 - USAID Center for International Disaster Information: cidi.org
 - Information on relief activities of the humanitarian community can be found at reliefweb.int.

USAID/BHA bulletins appear on the USAID website at [usaid.gov/humanitarian-assistance/where-we-work](https://www.usaid.gov/humanitarian-assistance/where-we-work)
