## Key highlights on refugee returns and cross border movements

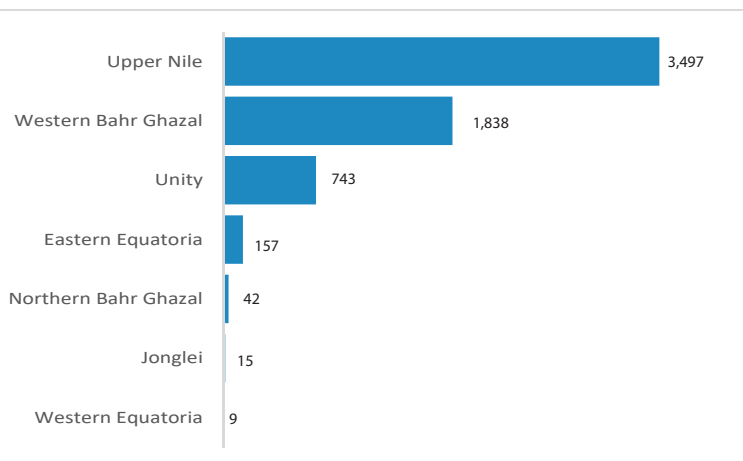

Return of 6,301 South Sudanese refugees have been verified and reported in the month of October 2022. This is a sharp decline as compared to the returns in the previous month since January 2022. The small decline was attributed to lack of transport

Information on returnees was collected in 66 Focus Group Discussions and 74 key informant interviews conducted during month of September in areas of return in the following 7 states of Western Equatoria, Jonglei, Northern Bahr El Ghazal, Eastern Equatoria, Unity, Western Bahr El Ghazal and Upper Nile. Most of the verified returnees to the eight States were mostly from Ethiopia (55%), Sudan (40%) and less than 10% from Uganda, Kenya, Democratic Republic of Congo and CAR. The majority of the returnees from Ethiopia went to Upper Nile State

## Top 3 border entry point September 2022

## Return per States for the month of October 2022

Most of the returns for October 2022 were from Ethiopia through Pagak and Matar/Burebley border crossing points of South Sudan while those from Uganda crossed through Nimule border points of Eastern Equatoria State with Uganda

## Contributing partners

## Reason for leaving country of asylum

- I- Lack of employment and livelihood opportunities (46%).
- ii- lack of access to basic services (19%)
- iii- Insecurity in the country of asylum (4%)

## Key protection concerns at border points and in areas of return (as reported by returned refugees) are:

- I- Lack of teachers and health professionals in the Education and health sector
- II- Shortage of food en route and in area of returns.
- II- Lack of support in form of NFIs and shelter material to returnees
- IV- Inter-communal conflicts among the communities in various parts of the country challenging livelihood and re-integration returnees.

## Reasons for returning to South Sudan:

The most cited reasons for returning to South Sudan from Country of Asylum include:-

- I- Improvement of security situation in South Sudan (10%)
- II- Reuniting with the family members (5%)
- II- Check and attend to property (2%)

## Methodology

The Relief and Rehabilitation Commission (RRC) in coordination with UNHCR and partners monitor cross-border movements at 42 border entry points and in areas of high return. Information is collected through interviews with returnees at border point and community based/house-hold level assessments regularly in areas of high return. The information is then triangulated data collected from focus group discussion, key informant interviews, and meetings with local authorities and faith-based leaders, law enforcement agents, and immigration officers in the border entry points and areas of returns
