

SUDAN EMERGENCY **Population Movement from Sudan**

as of 01 June 2023

OVERVIEW: There are now close to 1.4 million displaced overall due to the recent outbreak of conflict in Sudan, including 1,042,114 internally and over 330,000 in neighbouring countries. Sudan, impacted by this new emergency is already hosting large refugee populations. Assistance to the majority remains severely underfunded. Hosting countries will need additional support to provide protection and critical life-saving assistance. Initial assessments show that the new asylum-seekers, refugees, refugee returnees and other arrivals' most urgent needs identified to date are water, food, shelter, health, and core relief items. In terms of protection, the current priority activities are the registration of new arrivals and ensuring that mechanisms are in place to try and prevent and respond to gender-based violence and ensure alternative care services for refugee children.
