

OVERVIEW: There are now an estimated 2.7 million forcibly displaced due to the recent outbreak of conflict in Sudan, including 2,152,936 internally and 586,285 in neighbouring countries. Sudan was already hosting large refugee populations before being impacted by this new emergency. Sudan and hosting countries need additional support to provide protection and critical life-saving assistance. New asylum-seekers, refugees, refugee returnees and other arrivals' most urgent needs identified to date are water, food, shelter, health, and core relief items. In terms of protection, the current priority activities are the registration of new arrivals, relocation away from border areas, identification of specially vulnerable families and persons with specific needs, and putting mechanisms in place to prevent and respond to gender-based violence and ensure alternative care services for unaccompanied refugee children.
