UNHCR-IOM FLASH UPDATE #24

ARREST AND DETENTION FLOW MONITORING (15 September 2023 – 13 July 2024)

INTRODUCTION

In response to the Ministry of Interior's (MoI) decision of 26 September 2023 to enact an "Illegal Foreigners' Repatriation Plan", UNHCR, the UN Refugee Agency and IOM, the UN Migration Agency, have collated their data on the arrest, detention, and deportation of Proof of Registration (PoR) holders, Afghan Citizen Card (ACC) holders, and undocumented Afghan nationals as well as on the outflows of Afghan nationals at the Torkham and Chaman border crossing points, to better understand the protection environment and movements of Afghan nationals returning to Afghanistan from Pakistan.

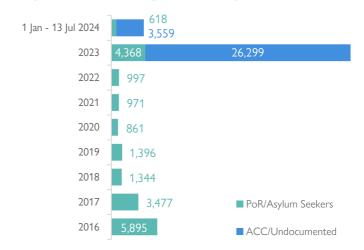

While the Government of Pakistan has yet to halt the "IFRP", the rate of arrest, detention, deportation, and returns has decreased significantly since its peak in October and November 2023. Furthermore, on 10 July 2024, the Government of Pakistan announced a further extension of the validity of the PoR card, until 30 June 2025.

KEY FINDINGS AND LIMITATIONS

It is important to note that prior to 2023, there was no data collected on the arrest and detention of ACC holders or undocumented Afghan nationals. Since January 2023, IOM has started to collect this data, which should be considered indicative at this point. The figures, particularly of undocumented Afghan nationals, should be considered underreported.

- During the period from 30 June to 13 July 2024, the overall reported rate of arrest and detention remained stable compared to the period from 16 to 29 June 2024, with a slight decrease of 6 per cent.
- From 30 June to 13 July 2024, ACC holders and undocumented Afghans represented 96 per cent of the total rate of arrests and
- Since the start of October 2023, the overall reported rate of arrest and detention remains highest for the province of Balochistan. During the period from 30 June to 13 July 2024, 88 per cent of the reported arrests and detentions occurred in Balochistan.
- Across Pakistan, the top three districts for arrest and detention between 1 January and 13 July 2024 are Chagai (Balochistan), Pishin (Balochistan), and Karachi (Sindh).

UNHCR-IOM FLASH UPDATE #24

ARREST AND DETENTION FLOW MONITORING (15 September 2023 – 13 July 2024)

IOM border monitor conducting an interview at Chaman border. [IOM Pakistan 2024]

KEY FINDINGS

- During the last two weeks, UNHCR and IOM's Displacement Tracking Matrix (DTM) estimate 19,494 Afghans returned through the Torkham, Ghulam Khan (located in Khyber Pakhtunkhwa), Chaman, Badini and Bahramcha (located in Balochistan) border crossing points to Afghanistan.
- Cumulatively, from 15 September 2023 to 13 July 2024, 665,306 individuals have returned.
- The number of returns in the last two weeks (30 June 13 July; 19,494) increased by 41 per cent compared to returns in the two weeks prior to that (16 – 29 June; 13,832). The number of returns during the reporting period has seen an increase compared to the previous report, however, returns continue to surpass the weekly return figures recorded since January 2024.
- Most of the returnees were undocumented Afghans (87%), followed by PoR holders (11%) and ACC holders (2%). Majority of the PoR returns are facilitated by UNHCR.
- Vulnerable persons including chronically ill people, elderly individuals, persons with disabilities, and others account for 3 per cent of the population.
- Fear of arrest (89%) remains the most common reason to return to Afghanistan among undocumented/ACC holders while PoR holders cite social economic challenges.
- Returnees were most likely to return from Quetta (20%) and Peshawar (19%) in Pakistan and intend to go to Nangarhar (24%), Kandahar (22%) and Kabul (19%) in Afghanistan.
