

## ARREST AND DETENTION FLOW MONITORING (15 September 2023 – 27 July 2024)

### INTRODUCTION

In response to the Ministry of Interior's (MoI) decision of 26 September 2023 to enact an "Illegal Foreigners' Repatriation Plan", UNHCR, the UN Refugee Agency and IOM, the UN Migration Agency, have collated their data on the arrest, detention, and deportation of Proof of Registration (PoR) holders, Afghan Citizen Card (ACC) holders, and undocumented Afghan nationals as well as on the outflows of Afghan nationals at the Torkham and Chaman border crossing points, to better understand the protection environment and movements of Afghan nationals returning to Afghanistan from Pakistan.

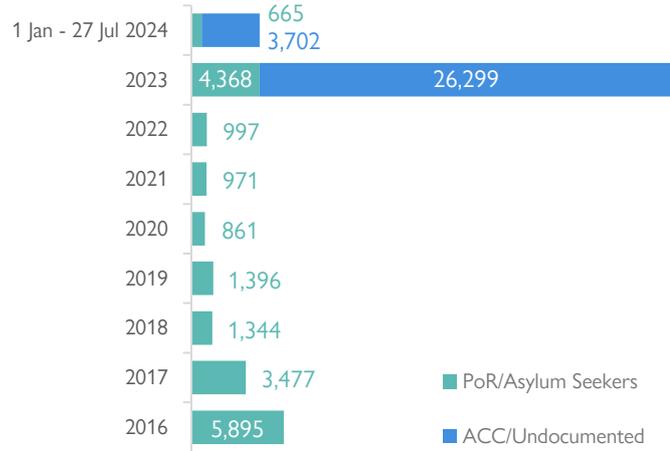

While the Government of Pakistan has yet to halt the "IFRP", the rate of arrest, detention, deportation, and returns has decreased significantly since its peak in October and November 2023. Furthermore, on 10 July 2024, the Government of Pakistan announced a further extension of the validity of the PoR card, until 30 June 2025.

### KEY FINDINGS AND LIMITATIONS

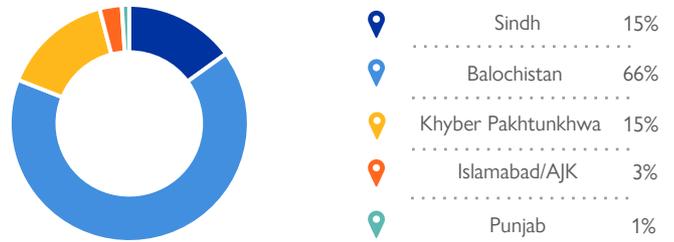

It is important to note that prior to 2023, there was no data collected on the arrest and detention of ACC holders or undocumented Afghan nationals. Since January 2023, IOM has started to collect this data, which should be considered indicative at this point. The figures, particularly of undocumented Afghan nationals, should be considered underreported.

- During the period from 14 to 27 July 2024, the overall reported rate of arrest and detention declined compared to the period from 30 June to 13 July 2024, with a decrease of 55 per cent.
- From 14 to 27 July 2024, ACC holders and undocumented Afghans represented 75 per cent of the total rate of arrests and detentions.
- Since the start of October 2023, the overall reported rate of arrest and detention remains highest for the province of Balochistan. During the period from 14 to 27 July 2024, 72 per cent of the reported arrests and detentions occurred in Balochistan.
- Across Pakistan, the top three districts for arrest and detention between 1 January and 27 July 2024 are Chagai (Balochistan), Pishin (Balochistan), and Karachi (Sindh).

## KEY FINDINGS

- During the last two weeks, UNHCR and IOM's Displacement Tracking Matrix (DTM) estimate 14,198 Afghans returned through the Torkham, Ghulam Khan (located in Khyber Pakhtunkhwa), Chaman, Badini and Bahramcha (located in Balochistan) border crossing points to Afghanistan.
- Cumulatively, from 15 September 2023 to 27 July 2024, 679,504 individuals have returned.
- The number of returns in the last two weeks (14 July – 27 July; 14,198) decreased by 27 per cent compared to returns in the two weeks prior to that (30 June – 13 July; 19,494). The number of returns figures continue to surpass those recorded in the first quarter of 2024.
- Most of the returnees were undocumented Afghans (88%), followed by PoR holders (10%) and ACC holders (2%). Majority of the PoR returns are facilitated by UNHCR.
- Vulnerable persons including chronically ill people, elderly individuals, persons with disabilities, and others account for 3 per cent of the population.
- Fear of arrest (89%) remains the most common reason to return to Afghanistan among undocumented/ACC holders while PoR holders cite social economic challenges.
- Returnees were most likely to return from Quetta (20%) and Peshawar (18%) in Pakistan and intend to go to Kandahar (31%), Nangarhar (27%) and Kabul (15%) in Afghanistan.
